Laserfiche Institute Conference Early Bird Registration Extended to December 4

Didn't make the November 16th Early Bird deadline to register for the Laserfiche Institute Conference? Don't worry – we've extended Early Bird registration for two weeks, so you have extra time to take advantage of preferred pricing!

Register before December 4 to lock in reduced rates: \$595 for the first attendee and \$395 for each additional attendee. That's a savings of \$200 per person. Please note that you must have cur-

rent LSAP to qualify for special pricing, and registration prices do not include accommodations or transportation.

You won't want to miss this year's conference – and now, with extended Early Bird registration, you won't have to. We'll see you in Los Angeles January 11-13.

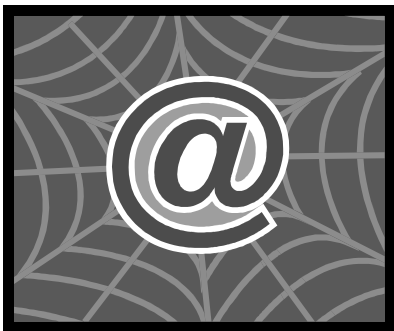

Register today!

Web Access 8.1 Released

Laserfiche is pleased to announce the release of the English version of Web Access 8.1. This release includes enhancements and fixes for Web Access 8, a variety of new features and support for the Laserfiche 8.1 Server. Web Access 8.1 enhancements include:

- **Enhanced Configuration Page Options:** remote access, SSL configuration per repository, automatic log in using cookies, restriction of specific accounts to Web Access.
- **Support for Laserfiche 8.1 Server Features:** recycling pages and electronic documents, LDAP authentication, WebDAV support.
- **E-mail Enhancements:** send pages of a document via e-mail, configure custom default e-mail messages, other e-mail enhancements.
- **Document Operation Enhancements:** progress bars, the ability to undo specific actions.
- **Metadata Enhancements:** metadata in the Preview Pane, client-side tag creation.
- **User Interface Enhancements:** a thumbnail view in the Folder Browser, a toolbar drop-down to support more toolbar buttons, a new Search Pane and annotation pane.

New Search Features: the ability to search by template, the ability to search Web Access using an Internet browser, List Field display, other enhancements.

Tech Tip: Web Access 8.1 Search: New Template and List Field Functionality

Web Access 8.1 has improved the way users can search by template and list fields. The Template search type has been updated to display fields associated with a template when selecting it from the template drop-down list. This allows users to not only search by assigned template, but also appropriate fields.

Also new in 8.1 searching is the way you search a list field. In 8.0, you typed the value you wanted to search for in the list field. In 8.1, you can select the value from a drop-down list. If the list of values to choose from exceeds 100, Web Access will auto-suggest choices based on the first letters you type in the list field.

The screenshot shows a search window with a 'Template' search type selected. The search criteria are: From: contains, To: contains, Subject (3): contains, Received: Any time, and CC's: contains.

List Selection Menu

The screenshot shows a search window with a list field search type selected. The search criteria are: is exactly, and the list field is open showing 'Approved', 'Denied', and 'Pending'.

List Auto Suggestions

The screenshot shows a search window with a list field search type selected. The search criteria are: is exactly, and the list field is open showing a list of countries starting with 'A': Afghanistan, Albania, Algeria, Andorra, Angola, Antigua & Deps, Argentina, Armenia, Australia, Austria, Azerbaijan.
